Call for Applications

Graduate Student Positions — Spring 2027

Master's and Ph.D. Programs

Dept. of AI·SW, Graduate School of AI·SW, Kookmin University

The AIN Lab (Applied INtelligence Lab) at Kookmin University (https://ain.kookmin.ac.kr) invites motivated and talented candidates to apply for supported graduate positions starting in the Spring 2027 semester.

Number of positions: 0+ (depends on candidate match). If there is no matching candidate, no one will be hired. More qualified candidates may be considered for other alternatives when available.

Note: this is a prescreening for the lab. Required official original documents will be shared with selected candidates to prepare. All detailed matters will be discussed with the selected candidates.

Core Domains and Research Areas

From raw data to applied intelligence.

Data	Intelligence	Applications
Sensor & multimodal inputs	Deep & sequence learners + transformers	Health & human systems
Time-series & sequence streams	Ensembles & optimization	Agri / environment / energy
Representation & features	Explainability & structured models	Industry & security

Current projects:

- Physics-Informed XAI for Flood Prediction and Lead Time Optimization (2026–2031, PI)
- XAI-Framework for Heterogeneous Data (2026–2029, PI)

Admission priority is given to candidates whose interests match the fields of our current NRF (National Research Foundation of Korea) projects. Outstanding candidates in other fields may also apply, and excellent candidates may be recommended for the **GKS (Global Korea Scholarship) university track**.

Duration of Support

Program	Support Period
Master's	24 months
Ph.D.	36 months

Benefits

- Monthly gross base stipend of up to 1.2 million KRW for the supported period of studies (may be adjusted depending on the funding situation and program supported*).
- Tuition fully or partially waived.[1]
- Opportunity to publish in top SCI-indexed journals.
- Work in a young and vibrant environment.

Requirements

Applicants should hold (or be completing) a degree in one of the following or a related field: Mathematics, Computer Science, Physics, Artificial Intelligence & Software, Computational Environmental Science, Industrial Engineering, or other closely related disciplines.

In addition, applicants must meet the following:

- **CGPA:** cumulative GPA (CGPA) percentile of 85% or above.
- **Ph.D. applicants:** first-author paper in a reputable SCI journal or at an outstanding conference in the fields of CS/AI/DS (see the full list).

[1] Waiver level depends on the program and is confirmed at admission.

- **Master's applicants (preferably):** experience publishing as first author in reputable international journals or conferences indexed by SCOPUS.
- Please provide your Google Scholar profile and/or a list of selected papers related to our research fields. All listed publications must have a DOI.
- English Language: IELTS 6.0 or TOEFL equivalent. Survival Korean language is a plus.
- Already living in Korea is preferred, but not required.
- Applicants should come from a reputable university; please provide the link to your university's website.
- Please provide the institutional email address of your previous advisor/supervisor.

Obligations

Supported students are expected to:

- Work as a full-time graduate research assistant in the lab.
- Work honestly and responsibly on the assigned project and research.
- Work hard, both as a team member and independently, and learn quickly.
- Publish in top SCI journals.
- Complete all coursework, the comprehensive exam, and language requirements within 2 years (Ph.D.) or 1.5 years (Master's).
- Maintain a GPA above 4.0 during coursework.

Important Notes on Funding

- The lab/professor scholarship does **not** cover airfare, visa fees, or other relocation costs.
- The stipend starts only after you have successfully registered at the university in Korea, completed your Alien Registration Card (ARC) process, and opened a Korean bank account.
- If the ARC or bank account setup is delayed, the stipend for the delayed months will be paid together (combined) once setup is complete.
- You must therefore be able to cover your living expenses for your first few months in Korea yourself.
- Tuition is handled separately and will be added when necessary.

Timeline

Date	Stage
8 October 2026, 10:00 KST — extended to 16 October 2026, 23:59 KST	Online application window
16 October onward (tentative)	Screening and interviews

All dates are subject to adjustment. Only shortlisted candidates will be contacted by email. Due to time constraints, no inquiries will be answered, and no feedback will be provided to other candidates. *Details of support, obligations, and admission will be briefed only to selected students, who will then be guided through the official admission procedure. Information about future opportunities may be shared by email with the top five non-selected candidates.

How to Apply

The application opens on **8 October 10:00 KST** and closes on **extended to 16 October 2026**. Please wait until the submission period opens. All times are KST (Korean local time). Submit your application information, curriculum vitae (CV), academic transcripts, and your Google Scholar link and/or selected papers (with DOI) online at the address below. A self-introduction, motivation letter, and research plan can also be uploaded to the system and will be considered as part of the evaluation. Applicants must also provide their agreement to the processing of their personal data as part of the application. The application will open on the specified date; in the meantime, take your time to prepare it. For **technical issues only** when uploading or submitting the documents through the link, please contact gs@ain.my.id.
